<b>Wind Rating</b>	<b>20 mph</b>	<b>25 mph</b>	<b>25 mph</b>	<b>30 mph</b>	<b>30 mph</b>	<b>43 mph</b>																																																															
<b>Stability*</b>	 <p><i>*Pull ups for demonstration only. Do not try at home. Will void warranty.</i></p>																																																																				
<b>Feet</b>																																																																					

**Disclaimer** Wind rating is determined from testing in a controlled environment. Tents should always be staked down with a stake kit and weighed down. Place at least 20lbs of weight on each leg; triple the weight for Premium tents. Use triple the amount when heavier wind gusts (20+mph) are expected. Tents should not be used in inclement weather, including thunderstorms, heavy rains, lightning, and high winds. User must read and observe assembly instructions. If this is not done correctly, it may result in damage to the unit, injury, or death, and all warranties will be void. All warranties will be void if hardware is used with any print not produced by us.
